Notes from HTML Meeting
November 28, 2018

Designer: Jenny Kim
Creative Director: Brandon Krisko

Comments:

- Need to work on responsiveness
    - Titles on the left side need to scale with the browser
    - Navigation bar items need to be made into an inline grid
        - If the navigation bar is going to remain horizontal, there needs to be more vertical padding around the items so that they are not directly on top of each other

- Navigation bar – some of the items are disappearing in their hover states

- Need more padding on the right in between the title and the body of content (images)

- Like the accent of color in the hover states

- Margins around pictures and paragraphs look great

- Maybe include a footer?

- Maybe bold important words in paragraphs?

- The two fonts complement each other well
